## ABOUT

I'm a Front End Web Developer, who loves what I do, with a strong foundation in production management, leadership and with excellent customer service. My education and professional background equip me with the skills and knowledge in order to be able to serve customers in the best possible way and make the teamwork a more organized and smooth way.

## PROJECT

- This React project made a request to the two Cryptocurrency APIs, where one of them is based on user input in a search bar. The returned image, description, and news about Cryptocurrency it was displayed on the page. The tools used were: HTML, React, RESTful API, and Github. - <https://cryptocurrencysearch.netlify.app>
- In this group programming project, we were tasked with completing a site that provides a TV show or movie to watch and a restaurant to order takeout from according to user input of their location and preferences. The tools used in the project were: HTML, CSS, React, RESTful API, Firebase, and Github. - <https://github.com/BingeFest/bingeFest>
